User Manual

What's Included

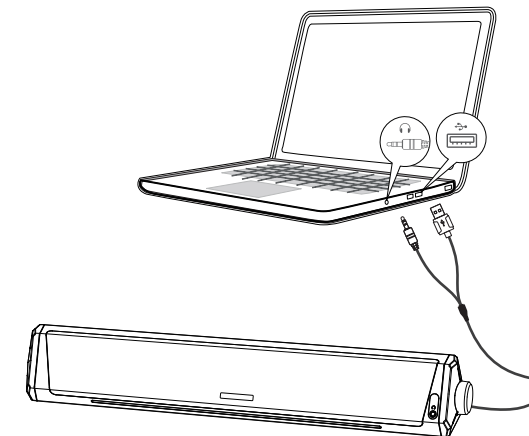

User Manual

BLUEDEE Computer Soundbar

Specification

| Device Model	SK010
Two Connection Options	AUX Cable & Bluetooth
Power Supply	USB Plug (No built-in battery)
Power Input	DC 5V⎓2A Max
Front Light	Breathing Light

AUX Connection

1. Power on: Plug the USB power cable into the power source (Computer USB port/USB power adapter/Power bank).

2. Connect with the audio source: Plug the 3.5mm audio cable into the audio jack.

3. Configure the sound output device on the computer:
Windows: Windows Setting ＞ System ＞ Sound ＞ Output ＞ Choose your Output Device

Mac:⌖ > System Preferences> Sound> Output> Choose your Output Device

---

Bluetooth Connection

1. Power on: Plug the USB power cable into the power source.

2. Enter Bluetooth mode: Press the knob for 3 seconds then release, and the lightbar will flash blue&red alternately.

3. Pair with your device: Turn on the Bluetooth of your device, find "SK010" in the search results and tap to connect.

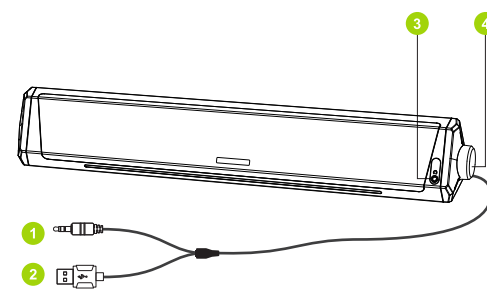

NOTE:
Switch to wired mode from Bluetooth mode: Press the knob for 3 seconds.

Product Diagram

1	3.5mm Audio Plug	3	3.5mm Earphone Jack
2	USB Power Plug	4	Multi-function Knob

Multifunctional Knob

Pause/Play: Click.

Volume Control: Rotate.

Front Light on/off: Press twice quickly.

Bluetooth/Wired mode Switch: Press for 3 seconds.

Reset: Press for 7 seconds.

LED Light Mode

1. Front Lightbar： Gentle breathing light (Default mode), double-click the knob to turn the light off/on.

2. Side Lights： They are power indicator lights that are not available to be turned off, unless unplugging the USB power cable or shutting down the power source.

Troubleshooting of Sound

Step 1. Adjust the volume: Make sure the volume is not mute on the soundbar, device (Laptop/Phone/PC), or App.

Step 2. Restart: Restart the computer, then replug the USB power cable & 3.5mm audio cable of the soundbar.

Step 3. Configure the sound output device on the computer:
Windows Setting ＞ System ＞ Sound ＞ Output ＞ Choose your output device.

Step 4. Test the soundbar with different devices to check whether the soundbar is faulted.
If the above does not work, please contact us.

Troubleshooting of Bluetooth

1. Reset the soundbar: Press the knob for 7 seconds until a "beep" is heard;

2. Delete the memorized "SK010" on your device, re-search "SK010", and re-pair with it.

Note: The connection between the soundbar and your device may be interfered with if there are a lot of Bluetooth or other 2.4GHz devices around.
